How to prevent selling item’s inventory into the negative.

Summary:

How to prevent selling item's inventory into the negative. Can users be prevented from selling items into a negative quantity? How to prevent selling into the negative, prevent quantity overrides.

Solution:

- Go to **Setup/ Point of Sale/ Security Codes** to edit the Point of Sale Security Code assigned to the user.
    - On the **Line Items** tab uncheck the **Override Qty Restrictions** checkbox.
- In **Setup/ Point of Sale/ Stores / Tickets-1** tab edit the **Quantity Override Method** to **Disallow**.
    - On the **Line Items** tab uncheck the **Override Qty Restrictions** checkbox.

NOTE: Stations setup with a **Default Entry Mode** of **Fast** will automatically use a quantity of 1 for each line item. The current quantity on hand for the item is not considered.

NOTE: There are other functions such as kit processing, importing Ecommerce orders, transfers, returns to vendor, etc, which can put an item's quantity on hand to a negative amount.
