Error: Your menu code does not allow you to post

Summary:

Error: Your menu code does not allow you to post

Cause:

The post activity for the transaction being attempted is not on the user's Menu Code.

Solution:

Review the User's Menu Code to ensure that the **POST** option for the transaction type being attempted exists. For example, if the error occurs when performing an inventory adjustment (**Inventory / Adjustment / Enter**), verify that the POST option exists on the Menu Code (**Setup / System / Menue code**) under the **Inventory / Adjustment** menu.
