How to find column information for tables

Summary:

How to find column information for tables

How can you determine what is contained in a column in a table?

Solution:

- Select **Setup / System / Configuration / Data dictionary**.
- On the **System Data Dictionary** form, select the table that contains the column in question.
- Under **Columns**, highlight the column name. Any relevant column information appears in the lower section of the **Main** tab under the **Column** tab.
