Practice Company limitations and functions

Summary:

Which functions will not work in the Practice Company?

Practice Company limitations and functions

Solution:

CPPractice will run every function allowed by the registration. The only things changed when the live data is copied to the practice company is the accounting interface and basic credit card functions are disabled.

Replication is not allowed on a CPPractice company.

Warning: The accounting interface and credit cards can be reset to work in the practice company. The script to copy a live system to a practice company just sets the Accounting Interface setup to **None** and credit cards to **Simulate**.

The other change to a practice company is all title bars and reports will show **Practice** and the company's name is changed to **CounterPoint SQL Practice Company**.
