How to prevent certain users from creating custom filters or lookups

Summary:

System Security Code authorizations include checkboxes to allow/disallow users from making certain customizations in the software.

Is it possible to prevent certain users from creating custom filters or lookups in NCR Counterpoint?

Cause:

Each user in NCR Counterpoint is assigned a system security code. These are defined under Setup/System/Security Codes. On the Authorizations tab, there is a section for Customizations which include checkboxes for:

Customize data dictionary, Customize filter dictionary, Customize lookup dictionary, Customize text dictionary, Customize zoom dictionary, Save customized data grids, and Customize toolbars.

Solution:

In **Setup / System / Security Codes / Authorizations**, uncheck **'Customize filter dictionary'** and **'Customize lookup dictionary'** to prevent a user from customizing filters or lookups.
