

About the Sales Analysis by Group Report

Summary:

About the Sales Analysis by Group Report

Solution:

The new Sales Analysis by Group report lets you group and analyze historical sales. Sales Analysis by Group is a very powerful reporting and analysis tool that lets you define and present dozens of different analyses of historical ticket sales.

Existing reports that did not provide true analysis capabilities have been renamed “History” (e.g., Sales Analysis by Sales Rep is now named Sales History by Sales Rep). The Sales Analysis reports provided in previous versions (Customer, Item, Item Category, and Vendor) have been removed from CounterPoint SQL.

Use the '**Group By**' options to filter the report to run the following Reports:

- Sales Analysis by Customer reportSales Analysis by Item Category report
- Sales Analysis by Item report
- Sales Analysis by Vendor report
- Sales History by Item by Customer report
- Sales History by Customer by Item report

There are more options available, refer to the Online help topics: "Sales Analysis by Group" and "Additional Sales Analysis by Group report layout options" for more details.
