

## DXRE Upgrade File Not Found

Article Number: 1292 | Rating: Unrated | Last Updated: Wed, Dec 16, 2020 at 1:45 PM

**Summary:** DXRE Upgrade File Not Found. **Cause:** This usually indicates a internet communication problem like a blocked port or address **Solution:** Did you Know that the DXRE931Server.exe was not in the CPSP8566.exe but was a link to the FTP site to downloaded it. Just learned that myself. In the CPSP85(66).exe is a file called the GETDXRE.VBS and it references a link to the FTP site to download DXRE931Server.exe.

The code is

```
DestFolder = "C:\Users\pc185069\AppData\Local\Temp\DXRETMP"
```

```
DestFile = "DXRETMP\DXRE931Server.exe"
```

```
URL = ftp://dxre9:GoNCR1dgn@files165.cyberlynk.net/DXRE931Server.exe It is recommend that the server have access to that address.
```
